

E-Z TREAT Synthetic Media Filter

Owner's Manual

Attention System Owner and Users

CAUTION: DO NOT OPEN OR ENTER ANY SYSTEM COMPONENTS FOR ANY REASON. IF A PROBLEM EXISTS OR YOU HAVE QUESTIONS ABOUT YOUR SYSTEM, CALL YOUR CERTIFIED SERVICES PROVIDER.

The E-Z Treat Recirculating Synthetic Media Filter requires the owner to engage a Certified Operator to maintain the system. During the first year, a Certified Operator should visit the site 2 times for inspection or adjustment. There after the Certified Operator shall visit the site at least once per year. No attempt should be made to adjust any component of this system except by a Certified Operator.

The E-Z Treat Synthetic Media Filter System allows the homeowner to receive a high quality, reliable and economical wastewater system that protects the environment. As with any onsite wastewater treatment system, the homeowner should be familiar with basic guidelines which help the system achieve repetitive, reliable performance. Please do not hesitate to contact your certified operator or E-Z Treat Company with any questions, concerns or comments about your E-Z Treat Synthetic Media Filter.

Proper Use of Your System

To assure proper performance of your E-Z Treat Recirculating Synthetic Media Filter, you should avoid disposing of the following products into your septic tank:

- Excessive Oil & Grease (kitchen waste)
- Water Softener backwash
- Wax & Resins
- Petroleum Products
- Paint & Paint Solvents
- Pesticides
- Condoms & Sanitary Napkins
- Toxic substances (Liquid Plumber, Drano, etc.)
- Non-Biodegradable products (cigarette butts, antibacterial wipes, etc.)
- Any kind of septic tank additive (Rid-X, etc.)

E-Z TREAT Synthetic Media Filter

Owner's Manual

Protect Your System

- Keep heavy loads and traffic off of your onsite system components and drainfield
- Never drive cars or trucks within 10 feet of any system access lids
- Landscaping or future building projects should be planned with the drainfield and drainfield repair area in mind.
- Do not shovel or blow snow on top of your onsite wastewater system. This will temporarily limit access to your system and could overload and damage the system.
- Makes sure drainage from the house or around the property is carried away from your onsite system.

Protect Yourself!

- **DO NOT OPEN OR ENTER ANY OF THE TREATMENT SYSTEM TANKS! SEPTIC GASSES CAN BE TOXIC, CAUSING SERIOUS INJURY OR EVEN DEATH!**
