The SSTS Technical Advisory Panel (TAP), a new technical subcommittee of the Advisory Committee, is expected to provide technical support to the MPCA on the registration of treatment and distribution products used in subsurface sewage treatment systems as specified in M.R. Chapter 7083.6000, subp.2. The Panel could also provide technical support for the new requirements related to sewage tanks as specified in M.R. Chapter 7080.1920 to 7080.2030.

The Technical Advisory Panel would provide technical support to the MPCA and Advisory Committee on a new process to: 1) register treatment and distribution products, 2) determine how these products are to be used in Minnesota, 3) review public domain standards, 4) review guidance documents, 5) provide support to the renewal of proprietary products, and 6) review proposed sewage tanks listing process to meet new rule requirements.

Panel members will be appointed by the MPCA commissioner and serve a three-year term, with a maximum of three consecutive terms. There are expected to be 12 panel members, representing local units of government, designers, advanced designers, installers, inspectors, advanced inspectors, service providers, engineers, soil scientists, the University of Minnesota, a member of the SSTS Advisory Committee, and the MPCA.

The selection of panel members will be based on the following criteria: certified in Minnesota, level of knowledge regarding treatment and distribution products, years of experience, no MPCA enforcement actions, obtain some level of geographic representation in Minnesota, and members are independent of product manufacturers, competitors, and distributors of products.

The Panel is anticipated to meet every four to six weeks during first 12 to 18 months and from two to four times annually, thereafter (including product renewals annually). The meetings are expected to be held at a central location or via video-conferences and meet-me-calls. Travel expenses are paid by the panel member.

Please complete the following application and return to Gretchen Sabel at the address shown below. You can submit additional documentation regarding your expertise in advanced treatment systems and distribution media products used in subsurface sewage treatment systems.

Please return completed form to Gretchen Sabel; Minnesota Pollution Control Agency, 520 Lafayette Rd N, St. Paul MN 55155; fax to: 651-297-8676; or send to the following email address: gretchen.sabel@pca.state.mn.us.
Name: ________________________________________________________________

Home address: ___________________________      __________________  MN _______
       Street       City     Zip

Qualifications for Position:

Occupation: ______________________________

Employer ____________________

Business Address __________________________________________

Years in position ____________________

Education beyond High School __________________________________________

Position (Check all that applies to your areas of expertise):

☐ SSTS Advisory Committee Member
☐ Local Unit of Government (QE) representative
☐ Designer
☐ Advanced Designer (Experienced in performing advanced design work and have attended related continuing education courses)
☐ Installer
☐ Inspector
☐ Advanced Inspector (Experienced in reviewing and/or inspecting advanced design work and have attended related continuing education courses)
☐ Maintainer (previously Pumper)
☐ Service Provider (Attended service provider training and have related experience as a service provider)
☐ Professional Engineer
☐ Professional Soil Scientist
☐ U of M Onsite Sewage Treatment Program Professional Employee

Optional (Describe why you would be a good choice to serve on this technical panel):
